Goat Show Feeds
Performance Nutrition for the Show Ring

Payback™
Champion Goat

Benefits:

• 18% Protein for maximum genetic growth and frame.
• High energy feed for muscle development and fast efficient gain.
• Contains Yeast Culture and Yucca Schidigera (Micro Aid®) to stimulate appetite and improve rumen function.
• Fortified with Zinpro® Performance Trace Minerals for improved immune system function and hoof health.
• Ammonium Chloride as an aid in the reduction of Urinary Calculi.
• Monensin for the Prevention of Coccidiosis.
• No withdrawal necessary.

Champion Meat Goat Pellets R20 Medicated

For growing and finishing goats.
For the prevention of coccidiosis caused by Eimeria crandallis, Eimeria christenseni and Eimeria ninakohlyakimovae.

ACTIVE DRUG INGREDIENT
Monensin (as monensin sodium)...................20.0 g/ton

FEEDING DIRECTIONS
CHAMPION MEAT GOAT PELLETS R20 MEDICATED is a complete feed especially designed for growing and finishing show goats. Feed this product continuously as the sole ration. Make sure that the feeders remain clean. In an effort to minimize management problems, goats should be offered approximately 10% good quality, long hay. Goats are ruminants, make all feed changes gradually. Fresh, clean water should be available at all times.

CAUTION: Do not allow horses or other equines access to feeds containing Monensin. Ingestion of Monensin by equines has been fatal. Feeding undiluted or mixing errors resulting in high concentrations of Monensin has been fatal in cattle and could be fatal in goats. Monensin medicated feed is intended for use in cattle or goats. Consumption by unapproved species may result in toxic reactions. For ruminant use only. Do not feed to sheep.

LIMITATIONS: Feed continuously. Do not feed to lactating goats.
Starting The Goat on Feed

Start your Goat on full feed with daily ration of 1/2 pound and increase feed by 1/4 pound every 2-3 days as long as they are cleaning it up. Provide good quality long stem hay at all times. Continue to challenge the Goat as they grow.

Your 4-H leader or CHS Feed Consultant will help outline a feeding program for your Goat, using the feed you have available on your farm.

Your feeding program will vary, depending on:
1) Age and size of Goat
2) Feeds available
3) Degree of finish on the Goat
4) Final weight and finish expected

Consult your local veterinarian for vaccination schedule and preventative health recommendations.

Goat Feeding Management

1) When hand-feeding, allow the Goat the amount of feed he will clean up in 45 to 60 minutes, twice each day. You may want to feed three times daily during the last 30 to 60 days on feed. If you choose to self-feed, make sure feed is available at all times and offer 10% good quality long stem hay. Take out any stale feed.

2) Clean out bunk before each feeding.

3) When hand-feeding, if your Goat leaves feed or has a poor appetite, cut back on feed for one or two feedings until he regains his appetite for the feed.

4) Feed should be increased gradually. After your animal is on full feed, do not increase his feed any more than 1/4 pound per day. A change from one ration to another should also be over a period of 5 to 7 days.

5) Watch your goat’s droppings for signs of trouble – scouring indicates he is getting too much grain and not enough hay, or that he is getting moldy grain or other feeds that cause digestive disturbances. When loose droppings occur, increase hay and decrease grain according to severity of the case.

6) Feeding more than one animal, or having other animals nearby, helps to gentle the goat and increase his appetite.

7) Provide free access to salt and mineral. Provide clean, fresh water at all times.

8) Work with your goat during the cool and comfortable times of the day.

9) Feed at the same time each day. Do not skip a feeding.

PROJECTIONS

Desired Weight at Fair ______ lbs
Starting Weight ______ lbs
Pounds of Gain Needed ______ lbs
Days to Fair ______ days
Average Daily Gain Needed ______ lbs

This feed was made in a feed manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feed.
