INGREDIENTS

Monocalcium Phosphate, Dicalcium Phosphate, Salt, Processed Grain Byproducts, Magnesium Oxide, Zinc Sulfate, Manganese Sulfate, Ferrous Sulfate, Basic Copper Chloride, Ethylenediamine Dihydriodide, Cobalt Carbonate, Calcium Carbonate, Sodium Selenite, Mineral Oil, Yeast Culture, Calcium Silicate, Calcium Salts of Long Chain Fatty Acids, Silicon Dioxide, Vitamin A Supplement, Vitamin D Supplement, Vitamin E Supplement, Natural and Artificial Flavors Added.

FEEDING DIRECTIONS

TRIPLE 12 CATTLE MINERAL PLUS CTC-2.8G MEDICATED is designed to be fed to beef cattle in selenium-deficient areas. It is especially recommended when the ration contains legume or legume-grain mixtures, when cattle are grazing pasture/range or receiving primarily roughage.

For beef cattle on pasture: Feed TRIPLE 12 CATTLE MINERAL PLUS CTC-2.8G MEDICATED at the rate of 2 ounces/hd/day to provide 350 mg of chlortetracycline per head per day.

For beef cattle weighing under 700 lbs: Feed TRIPLE 12 CATTLE MINERAL PLUS CTC-2.8G MEDICATED at the rate of 2 ounces/hd/day to provide 350 mg of chlortetracycline per head per day.

For beef cattle weighing over 700 lbs: Feed TRIPLE 12 CATTLE MINERAL PLUS CTC-2.8G MEDICATED at the rate of 0.29 ounces per 100 pounds of bodyweight to provide 0.5 mg/lb. of bodyweight daily. Feed at a rate to provide not more than 3 mg of selenium per head daily.

Fresh, clean water should be available at all times.

CAUTION: Livestock fed a phosphorus-deficient ration may over-consume minerals when they are first offered. During the first week, limit the amount of mineral to the minimum amount allowed daily to prevent individual animals from monopolizing access to the feeder. Do not feed to sheep. Follow label directions. The addition to feed of higher levels of this premix containing selenium is not permitted.

WARNING: A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal.

Contains Xtra-Dry®-a weatherizing agent.
