

# ULTRAMIN® 12-12 PLUS

For Cattle on Pasture.

## GUARANTEED ANALYSIS

Calcium	not less than	12.0	%
Calcium	not more than	14.0	%
Phosphorus	not less than	12.0	%
Salt	not less than	3.0	%
Salt	not more than	4.0	%
Magnesium	not less than	3.0	%
Cobalt	not less than	20	ppm
Copper	not less than	2,500	ppm
Iodine	not less than	200	ppm
Manganese	not less than	3,500	ppm
Selenium	not less than	36.0	ppm
Zinc	not less than	7,500	ppm
Vitamin A	not less than	300,000	IU/lb
Vitamin D	not less than	30,000	IU/lb
Vitamin E	not less than	500	IU/lb

## INGREDIENTS

Monocalcium Phosphate, Dicalcium Phosphate, Processed Grain Byproducts, Calcium Carbonate, Magnesium Oxide, Salt, Yeast Culture, Mineral Oil, Zinc Amino Acid Complex, Manganese Amino Acid Complex, Copper Amino Acid Complex, Zinc Sulfate, Manganese Sulfate, Basic Copper Chloride, Ethylenediamine Dihydriodide, Cobalt Carbonate, Sodium Selenite, Natural and Artificial Flavors Added, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Calcium Silicate, Calcium Salts of Long Chain Fatty Acids, Silicon Dioxide.

## FEEDING DIRECTIONS

ULTRAMIN® 12-12 PLUS is designed to be fed to beef and dairy cattle in selenium-deficient areas. It is especially recommended when the ration contains legume or legume-grass mixtures, when cattle are grazing pasture/range or receiving primarily roughage. ULTRAMIN® 12-12 PLUS contains organic copper, manganese, and zinc for improved bioavailability.

ULTRAMIN® 12-12 PLUS may be fed either free choice or mixed with other feed. When feeding free choice, a covered mineral feeder is recommended to protect the mineral from the weather.

Consumption will vary with the type of ration being fed and the individual appetites of animals. With most feeding conditions, consumption should be approximately 2-3 ounces per head daily. Free choice salt should be available in a separate feeder when feeding this product. Fresh, clean water should be available at all times.

**CAUTION:** Livestock fed a phosphorus-deficient ration may over-consume minerals when they are first offered. During the first week, limit the amount of mineral to the minimum amount allowed daily to prevent individual animals from monopolizing access to the feeder. DO NOT FEED TO SHEEP. Follow label directions. The addition to feed of higher levels of this premix containing selenium is not permitted.

ULTRAMIN® is a registered trademark of CHS Nutrition.

Contains Xtra-Dry®-a weatherizing agent.
